Career Objective

As a passionate and curious BCA graduate, I am eager to begin my career in the field of technology where I can continue learning, contribute meaningfully, and grow both personally and professionally. I have developed a strong foundation in programming languages such as Python, Java, PHP, and web development technologies like HTML and CSS. My final year project, an Instagram clone called Vibzz, sparked my deep interest in real-world application development.

I believe in learning by doing, which led me to complete internships in both technical and operational roles including Python programming sponsored by the Karnataka Government and warehouse management at Flipkart. These experiences taught me discipline, teamwork, and the importance of adapting quickly.

I aim to work in an organization that encourages innovation and offers a collaborative environment. My long-term goal is to become a full-stack developer who builds impactful digital solutions.

Education

Bachelor of Computer Applications (BCA)

Government First Grade College, Kolar CGPA: 7.18

PUC

Janatha PU College, Kembodi Percentage: 54.66%

SSLC

Yalamma High School, Tamaka, Kolar Percentage: 79.84%

Technical Skills

- Basic C
- Java
- C++
- Python
- PHP
- HTML
- CSS

Internships

Python Programming Internship

Vinay Kumar V

Tamaka, Kolar | 9611092902 | vinaykumarv2303@gmail.com

Sponsored by Karnataka Government (Karnataka Jnana Kendra - KJK)

- Hands-on experience in Python programming and applications.

Warehouse Management Internship - Flipkart

- Duration: 1 Month
- Learned warehouse operations, logistics, and inventory control.
